100 CLUB

KliC 4 Training Programme Outline 2010

“Making a Difference.... with a difference!”

Knowledge & Learning in the Community

The joint Berkshire Community Foundation & KliC 4 Training “People Programmes” are the first of their kind in UK. They allow local SMEs to combine valuable CSR & Community Engagement **and** tangible and impactful business and leadership development for their staff.

Each session is built around a hands-on project at a Berkshire charity, and is structured to give maximum ROI to all parties involved. It’s a day which makes a difference... with a difference! Its a great outcome for the charity plus fun, feelgood AND improved performance *on specific management themes* to 100 Club participants.

Working on charity projects is, quite rightly, seen to offer learning benefits to those involved. However, international surveys show that the *effectiveness is lost unless the experience has defined development aims and structured interventions and reflection time*. KliC 4 Training’s expert facilitators set up the experience and guide participants through it, cleverly allowing a business to combine training budget and employee volunteering’ time.

The concept has been pioneered over several years by KliC among large corporate clients.

We are extremely proud that this initiative for SME’s has been selected as a Master Class Case Study at the 2010 CIPD National Conference (Chartered Institute of Personnel & Development) at Olympia in London.
